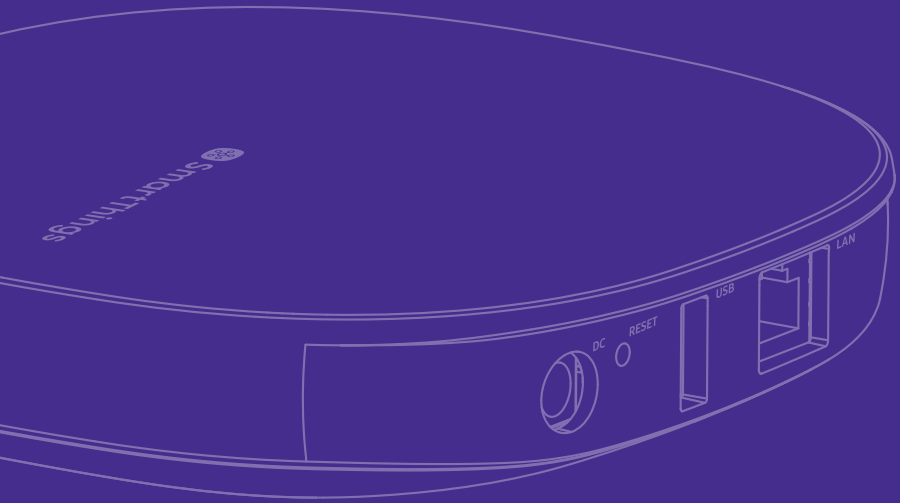
Welcome to your

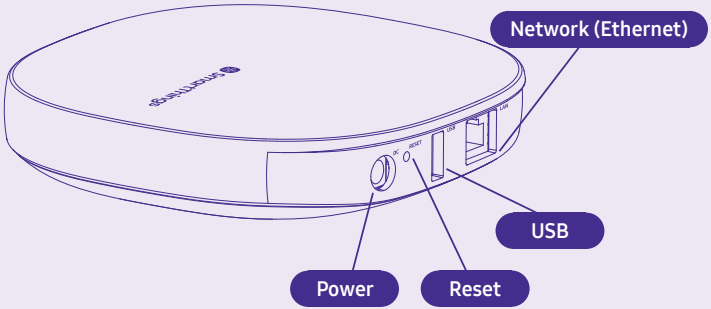
Hub



Setup

1. Connect the SmartThings Hub to the wall power using the supplied power cable.

   Tip: The SmartThings Hub works best when placed in a central location in your home. It should not be placed on top of or immediately next to other wireless devices.

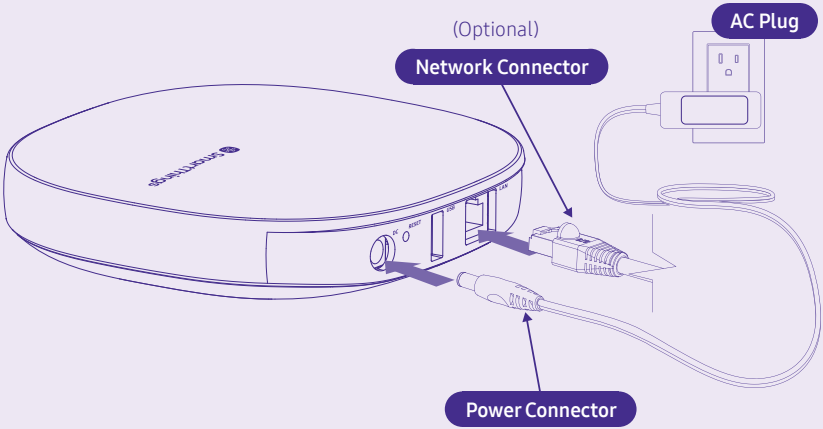


2. Download the free SmartThings app for Android or iOS, and create an account. Select the "Add device" card and then select the "Hubs" category to connect your SmartThings Hub.

3. Follow the on-screen instructions in the SmartThings app to connect the Hub to your Wi-Fi network and complete setup.

Tip: You can also connect the SmartThings Hub to your Wi-Fi router using the supplied Ethernet cable.

If you have any difficulty setting up your SmartThings Hub, please visit **Support.SmartThings.com** for assistance.



Using your

Hub

Suggestions

There are many ways that you can use a SmartThings Hub as the brain of your smart home:

- Monitor, control, and help secure your home.
- Automate your lights, control your home's temperature, and help save money.
- Teach your home a few new tricks and make life a little bit easier.
